ABOUT ME

Product and technology leader with 11+ years founding and scaling ventures end to end. Co-founder of Works4you, where I own the technology product — building it hands-on with AI and vibe-coding — and drive business development. Founder and CEO of TWOTONE, a fashion brand I ran end to end for a decade, and former product manager of the POKER111 SaaS platform. I own product from first idea to launch — concept, specs, the build itself, and the operational and financial discipline to make it real. EMBA, Tel Aviv University.
