ABOUT ME

Product leader and two-time founder with 11+ years owning products and the funnels that grow them — from first touch to purchase to repeat. I ran an e-commerce + retail business end to end for a decade, build product hands-on with AI today, validate with lean experiments before spending real money, and make decisions from dashboards I build myself. EMBA, Tel Aviv University.

CAREER HIGHLIGHTS

- Own Works4you's technology product end to end — concept, specs, and the hands-on build with AI tools — validating with lean, low-cost experiments with clear hypotheses before launch.
- Built and ran TWOTONE's e-commerce + retail funnel for a decade — website, marketing automation, CRM, and payment flows — owning acquisition through conversion and repeat purchase, alongside full P&L and 100+ boutique partners.
- Built performance dashboards and analytics (Power BI, Looker Studio) and automated workflows at POKER111, and led distributed engineering teams across three continents.
